The following is an examiner's statement of reasons for allowance: The present claims recite that the cathode has a particulate binder. Applicants argue that Goto does not disclose a particulate binder, because his disclosed binder, polyvinylidene fluoride, would be dissolved when mixed with N-methyl pyrrolidone, thus resulting in an electrode in which the binder is not particulate. While Goto does not specify that this polymer dissolves in this solvent, Kim *et al.*, from *Bull. Korean Chem. Soc.*, is cited to show that this dissolution would have to occur. See page 1126, left column, second full paragraph. Thus, applicant's argument is persuasive.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
